

PITCH DECK

HELYON TOKEN

THE NEXT-GEN SOLANA ASSET FOR UTILITY,
STABILITY & SCALABLE GROWTH

BUILDING A UTILITY-DRIVEN DIGITAL ECONOMY

2025

UNIFICATION

STABILITY

UTILITY

A solution designed to unify ecosystems, restore trust, and create sustainable long-term value

Helyon Solution

Helyon delivers a transparent, utility-driven SPL token framework that transforms fragmented user experiences into a cohesive, scalable digital economy.

TOKEN UTILITY

HELYON TOKEN

REAL UTILITY FOR A SUSTAINABLE ECOSYSTEM

STAKE REWARDS

EARN HEL TOKEN

ENERGY CREDIT

UNLOCK BENEFITS

GOVERNANCE POWER

VOTE DECISIONS

ECOSYSTEM ENTRY

PRIORITY ACCESS

STRUCTURED, TRANSPARENT, UTILITY-DRIVEN ECONOMIC MODEL

01
Community – 35%

Growth, incentives,
ecosystem expansion

04
Treasury – 10%

Ecosystem funding,
strategic reserves

07
Advisors / VC – 3%

Expert guidance, strategic
partnerships

02
Staking – 25%

Rewards, long-term yield

05
Developer – 7%

Protocol upgrades,
technical operations

03
Team – 15%

Locked allocation,
development continuity

06
Marketing – 5%

User acquisition, global
outreach

1.5B Total Supply

Fixed and fully minted supply ensuring
predictable long-term token economics.

Clear Allocations

Each wallet audited and transparently
structured for ecosystem stability.

Long-Term Vesting

Team & Treasury tokens locked with
linear release schedules; investor
allocations secured through TGE +
monthly vesting.

FAIR, STRUCTURED, INVESTOR-READY PRESALE

Presale Price

\$0.0085 per HEL

Presale Allocation

112.5M HEL

The presale is designed to provide a fair entry point for early supporters while ensuring long-term sustainability through a secure, transparent vesting framework

Vesting Model

30% TGE + 7-Month Linear

Soft Cap &
Hard Cap

\$100,000
\$350,000

Min Buy & Max
Buy & Currencies

\$50 - \$1,000
USDC / USDT / SOL

OPEN ACCESS FOR BROAD MARKET ENTRY

Public Sale
Price

\$0.01 per HEL

Public Sale
Allocation

75M HEL

Vesting Model
20% TGE + 8-Month
Linear

Soft Cap &
Hard Cap

\$100,000
\$300,000

Min Buy & Max
Buy & Currencies

\$20 - \$1,500
USDC / USDT / SOL

The public sale expands accessibility to a wider audience, enabling transparent price discovery and establishing a stronger, more distributed token holder base.

STRATEGIC ROADMAP FOR SCALABLE GROWTH

Q1 2026 Foundation & Launch

- Presale completion + token launch operations
- Liquidity deployment on Raydium
- Website + dashboard final rollout
- Security audit publication
- Staking module preparation phase

Q2 2026 Expansion & Utility

- Staking program launch
- Energy Credit system beta testing
- Helyonverse architecture preparation
- New partnerships & ecosystem integrations
- Community growth & global marketing expansion

Q3 2026 Ecosystem Build-Out

- Energy Credit mainnet release
- Governance module activation
- Developer tools + API release
- Cross-platform utility integrations
- Sidechain feasibility & research execution

MORE TO COME...

MARKET OPPORTUNITY

HELYON TOKEN

A CLEAR MARKET GAP THAT HEYLON DIRECTLY SOLVES

Demand for Transparent Tokenomics

Most new Solana tokens launch without clear vesting, real audit evidence, or wallet transparency. Helyon fills this gap with verifiable wallets, documented vesting, and an open economic model.

Utility-Focused Tokens Are Becoming Rare

Speculative, “no-utility” meme tokens dominate the market. Helyon positions itself as a utility-first ecosystem with staking, Energy Credits, governance, and real unlockable features.

Ecosystem Projects Need a Stable Core Asset

Web3 communities and dApp builders need a reliable token foundation for access, credits, and integrations. Helyon becomes the core token for Helyonverse modules, future network plans, and cross-platform utility.

WHY HEYLON OUTPERFORMS TYPICAL SOLANA TOKENS

Transparent Token Architecture

Helyon's wallets, vesting schedules, and distributions are fully verifiable, eliminating trust issues that dominate the Solana token landscape.

Real Utility Instead of Speculation

Staking, Energy Credits, governance access, and ecosystem unlocks create an actual economic loop – not a hype-driven cycle.

Ecosystem-First Economic Model

Every allocation (Community, Staking, Developer, Treasury) directly supports long-term functionality instead of short-term pump mechanics.

Future-Ready Infrastructure Vision

Helyonverse, Energy Credit mainnet, and long-term sidechain research position Helyon as a scalable, modular ecosystem—not just a single token.

SECURITY FIRST. TRUST ALWAYS.

01

Transparent Wallet Structure

All major allocations (Community, Staking, Team, Treasury, Developer, Marketing, Advisors) are publicly verifiable and traceable on-chain.

03

Locked & Controlled Vesting

Team and Treasury tokens follow strict locked schedules with linear monthly releases – preventing early sell pressure and ensuring long-term stability.

02

Internal Audit Standards

Helyon maintains its own audit and review framework, covering token metadata, wallet transparency, liquidity structure, and anti-rug policies.

04

Secure Economic Design

No hidden mint authority, no freeze authority misusage, and a predictable supply system based on clean mathematical tokenomics.

FOUNDER, LEAD ARCHITECT & CORE STRATEGIST “RAIF S.”

The single mind shaping Helyon's token architecture, utility framework, ecosystem planning, security standards, and long-term development vision. Every layer of Helyon is intentionally designed under one unified direction – without fragmentation, without dilution, without compromise.

1) TECHNICAL MASTERY

SPL token creation, Solana integrations, metadata systems, vesting logic, and ecosystem planning executed directly by the founder.

2) SECURITY-FIRST MINDSET

Wallet transparency, audit preparation, vesting strategies, and on-chain validation designed with zero-compromise discipline.

3) STRATEGIC VISION & EXECUTION

From tokenomics to Helyonverse to future sidechain planning – all decisions follow a unified long-term strategy, not fragmented committee thinking.

HELYONVERSE: A MODULAR DIGITAL UTILITY WORLD

Energy Credit Ecosystem

A system where HEL powers access, upgrades, utilities, and future features – turning holding into real economic activity.

Scalable Modular Architecture

Helyonverse is designed as an expanding ecosystem with plug-in modules for staking, credits, governance, identity, and future dApp integrations.

Cross-Platform Future

Helyon's architecture prepares the ground for future sidechain research, cross-chain utilities, and a self-sustaining digital economy.

Long-Term Utility Loop

Every action in Helyonverse loops back into HEL:
access → usage → credits → expansion
→ demand → growth.

CLOSING & CALL TO ACTION

HELYON TOKEN

THE FUTURE OF UTILITY BEGINS HERE

Helyon is building a transparent, utility-first ecosystem designed for long-term value, real functionality, and a scalable digital future.

Join us as we shape the next evolution of the Solana economy.

Be early. Be part of Helyon
